Disclaimer:

This eBook is an unofficial guide for Kindle Fire HD apps and is not meant to replace any official documentation that came with the device or from the app developers. The information in this guide is meant as recommendations and suggestions, but the author bears no responsibility for any issues arising from improper use of the tablet or apps. The owner of the device is responsible for taking all necessary precautions and measures with their tablet. Please note that app prices and ratings are subject to change.

Author Introduction

Hi, I'm Shelby Johnson, a technology enthusiast and Kindle Fire HD owner. I am the Amazon Best Selling author of [Kindle Fire HD User's Guide Book: Unleash the Power of Your Tablet!](#), [Kindle Paperwhite User Manual: Guide to Enjoying your E-reader!](#) and [Facebook for Beginners: Navigating the Social Network](#). I have helped thousands of Kindle Fire HD owners get their tablets up and running, and hundreds of Facebook users get started on the social network. Now, with my new eBook, I lay out hundreds of the best apps available for the Kindle Fire HD, so that you can continue getting each and every thing you can get from your tablet.

With this new tablet, I absolutely love its many standard features and capabilities, but I have found there is so much more that can be done with it. I've learned a lot of great things you can do with a Kindle Fire HD, and want to help you find the very best apps to make the most out of your Kindle Fire HD. Your time is valuable, so I have created this easy to use apps guide to allow you to get the most out of your Kindle Fire HD without spending so much time and money trying to figure out which apps are the best. Without it, you may find yourself lost, downloading and trying many different apps that will not work. At the very least, you will miss out on some of the amazing features this tablet offers with apps that help unleash its power.

In fact, this eBook is ESSENTIAL for any new Kindle Fire HD owner. If you give a [Kindle Fire HD](#) as a gift and do NOT purchase this apps guide along with my best selling [User's Guide](#), you're giving an incomplete gift.

Here is just some of the great info you'll find in this User's Guide Book:

- 100+ free and paid apps broken down by categories.
- Ratings of each of the listed apps to help you easily see how much the app is liked by other users.
- Helpful download links for each app to make it easier to get the app on your device.
- Instructions for purchasing, downloading, installing, and removing apps from your device.

You will learn all of the above and more in this book, which features links directly to the apps on Amazon, and step-by-step instructions for downloading and installing them, so that you can unleash the many powerful features your Kindle Fire HD offers!

Beware of other eBooks about Kindle apps. Some are incomplete and do not provide you with all the info you need. Others include just a simple listing of all the "Bestselling apps." For the 99 cent price of my eBook, you definitely receive an excellent value.

How to “Purchase” or Install an App

In this book, I’ve provided convenient “Download from Amazon” links after each of the apps I recommend. This makes it much easier to quickly install an app on your device. However, it’s important to also know how to purchase, install, and remove apps from your device.

Apps can be purchased either from your Kindle Fire HD device or online at the Amazon.com app store.

To purchase/install an app on the Kindle Fire HD:

1. Tap on the “Apps” choice on the top menu of your Kindle Fire HD home screen.
2. Tap on the “Store” choice in the upper right corner of your device.
3. You can “Search Appstore” for the app you want to purchase/install, or browse the various Best Sellers, Games, New Releases, and other categories.
4. Once you have found the app you would like to purchase or install, tap on that app.
5. Tap on the orange bar you’ll see on the left side (landscape display), or top of your screen (portrait display). The button will say “FREE” or “\$Price” based on whether the app is free or paid. Tap that bar to purchase or get the app.
6. The orange bar turns green and says “Get App.” Tap on the green bar to download and install the app to your device. It may take several moments for the app to install.
7. Tap on the orange “Open” button to open the new app on your device.

Note: Even for a free app, it will first say “purchasing” when you start to download the app. You will not be charged for free apps. Apps with a price are automatically charged to your Amazon account based on the payment method you have set up for purchases.

To purchase or install an App from Amazon.com website

You can purchase paid apps or get free apps online at the Amazon app store and have them automatically sent to your Kindle Fire HD tablet. For example, you may be using a laptop or personal computer at home when you see an app that you want. The following explains how to purchase an app using a computer and have it sent to your Kindle Fire HD:

1. Make sure you are logged into your account at Amazon.com.
2. On the Amazon.com website go to the "Shop by Department" drop-down menu. You should normally see this on the upper left-hand side of your Amazon.com page.
3. Go to the "Appstore for Android" menu category, and then click on "Amazon Apps."
4. You can type the app you're looking for in the search box at the top of the page, or you can browse the categories listed on the page.
5. Once you are at the specific page for the app you want to install on your Kindle Fire HD, go over to right hand side of the page. You should see a "Get Now with 1-click" button. You will also see whether the app is compatible or not with any of your devices. Click on the "Get Now" button once you have made sure your Kindle Fire HD is compatible with the app. You will be taken to a completed "purchase" page for the free or paid app.
6. The app will now be stored in your Cloud. You can now go on your Kindle Fire HD tablet to Apps, and then "Cloud" to find the app.
7. Press and hold down your finger on the app. A pop-up menu will give you several choices including "Download." Tap on "Download" to install the app on your device. It may take several moments for the install to complete.

Helpful Tip: *You can also check out all of the apps you have purchased and installed by going to the "Your Apps & Devices" menu choice once you are in the "Appstore for Android" on Amazon.com. There is also an "Actions" button at the right-hand side of each of the apps to help "Delete this app" or review the order details as well.*

How to Remove or Uninstall an App

The steps to remove or “uninstall” an app from your Kindle Fire HD are simple.

1. Tap on the “Apps” choice on the top menu of your Kindle Fire HD home screen.
2. Tap on “Device” to show all of the apps currently on your Kindle Fire HD.
3. Press down on the app you want to remove and hold your finger (or stylus) on the app. A box will pop up with choices: “Add to Favorites” and “Remove from Device.”
4. Tap “Remove from Device.” The item will be removed from your device.

Note: Keep in mind when you remove an app from your device, the app should still appear in the “Cloud” area for your Kindle Fire HD. See the previous section’s “Helpful Tip” for how to completely remove the app from the cloud as well.

Sideload

Sideload is a fancy term for transferring media files from one device to another, usually from a USB drive, Bluetooth technology, or memory card. This ability allows you to transfer files effortlessly, which means you can have all of your images, documents, videos, and music in one place, even if it is coming from someone else. Think of sideloading as something you have always done with your laptop or desktop computer, and expand that thought process to your new Kindle Fire HD.

For the most part, the terminology here refers to a way to put apps onto your tablet that aren't necessarily available through the Amazon app store. There may be a few apps listed in this guide which will require sideloading, such as the Dolphin Browser.

Sideload Other Apps with .getJar

The .getJar app store is an independent mobile app store that will allow you to step outside of your device's app shop, and look for new and exciting options that you may have not considered before. With over 350,000 apps available with this service, you can experience independent apps – as well as all of your standard favorites, like Angry Birds – from software developers around the world. Its popularity is booming, with users downloading approximately three million apps per day using the service.

How to Sideload on Your Fire HD

1. Go into your Kindle Fire HD settings and select “allow installation of applications from unknown sources.”
2. From there, it's recommended that you install a file explore app, such as ES File Explorer For Cupcake. This will allow you to see any third party apps you obtained that weren't from the Amazon app store, and install them with sideloading on your device.
3. Recommended app store sites for getting other apps are .getjar and 1mobile.com, both of which can help you through instructions on installing Android-based, and other apps on your device.

Remember to tread with some caution in doing this, as there is always potential that a third party app may not work properly or could cause additional issues on the Kindle Fire HD.

These are the basics on adding, removing, or sideloading apps for your device. I have covered many more helpful tips and tricks for apps on the Kindle Fire HD in my best selling eBook:

[Kindle Fire HD User's Guide Book: Unleash the Power of Your Tablet!](#)

Now let's move on to my recommendations for the best apps you can have on your Kindle Fire HD tablet!

Books & Comics

Free Kindle Books and Tips by Gagler Enterprises, LLC

Doing more than giving you access to the top rated Amazon Kindle blog, the Free Kindle Books and Tips app provides its users with immediate updates and synchronizes to the site's posts. It also provides tips for operating the device, and free Kindle book listings.

In fact, the app goes as far as to provide physical links users can click on to gain access to the free book offers. Lastly, it pushes free Kindle book notifications from a number of outside sources, delivering the information succinctly and responsibly, in an effort to expand digital libraries across the globe, all for free! The app allows its users to join the interactive Kindle community, while gaining access to some of the web's best "How To" guides with a few taps of their fingertips.

Kindle Buffet ... A Menu of the Best Free Kindle Books, Fresh Daily by Weber Books

Foodies have the luxury of restaurants and dinner parties to explore what's fresh in cuisine, and while Kindle Buffet does not physically deliver food to its users, it does provide a smorgasbord of bestselling free Kindle books for anyone and everyone who would like to enjoy them.

This savvy app treats all readers equally, delivering books of nonfiction, fiction, romance, business, and educational services – even cookbooks, just to name a few – so everyone is privy to the digital book promotions that Kindle authors so avidly distribute.

Users no longer have to scan the digital pages of free books for something new, as Kindle Buffet delivers them on a platter. In addition, the app provides a catalog of the highly touted Kindle accessories, with ratings, reviews, and feedback, leaving its users constantly in the know.

Goodreads by Goodreads

Goodreads provides readers of all ages with access to reviews, and the online reading community by delivering the power of social media and interactivity to the Kindle, while intermingling the popularity of the two with the bookworm's penchant for, well, good reads.

The app allows individuals to add books to the virtual bookshelf in an effort to share them with the over ten million members of the Goodreads community. With over 12 million books to choose from – with thousands of them falling under public domain (read: free!) – including exceptional reviews and the ability to share the books info in its entirety through Pinterest, Facebook, Twitter, text message, or email.

What's more is the app includes a barcode scanner, so users can simply scan the ISBN from any book – in a home, bookstore, or doctor's office – and add it to their "to-read" list. Friends, family members, and strangers can all rate and review the books they have read, join online book clubs, and even find a literary engagement such as a book signing in their own cities.

Never buy another book again, without getting the Goodreads input first.

City Info

Urbanspoon by Wanderspot

Urbanspoon not only provides a fun way to make a decision about where to eat, thanks to its restaurant slot machine, where users shake their devices to reveal a digital pick for any meal, but it also provides informative, up-to-date information to ensure that the restaurant you choose is still operating from the given location.

Whether users are looking for a specific type of food – Italian, Moroccan, Mexican, and the like – or are simply entertaining their four-star palette, this app divides and conquers the results to its users' requests to provide exact results with each use. The popularity and pricing of restaurants is just as easy to find, and the app allows users to check the table availability and even make reservations directly from their Kindle Fire HD.

Users can read reviews from other patrons, while posting their own after enjoying a meal, location, or even the ambience of a restaurant. Once users choose a restaurant, they can map it through the app, and get step-by-step instructions on how to get there. It is fun, easy, and a fantastic tool for travelers.

White & Yellow Pages (Kindle Tablet Edition) by Avantar

As they say, there is power in numbers and with millions of users relying on the old standby – the phonebook – people and businesses have never been easier to find. The White & Yellow Pages have come a long way since being delivered to every doorstep in the United States, and this giant phone book is now available digitally and better than ever.

As one of the top 50 downloaded apps, it provides search results for individuals and organizations by name, address, or even with a reverse look-up function using phone numbers. Once the information is displayed, it can be added to contacts, saved as a favorite, and in some cases provide a direct link to the available website. The app also provides GPS instructions to get to a certain location without a hitch, and it allows the ease of tracking the history of searches, just in case users need the information more than once.

Communication

textPlus Free Texting + Group Text by GOGII, Inc

With the unpredictable costs of text message and data rates swirling over devices, textPlus brings a liberating and exciting form of chatting to its users – without the worries of interrupting an existing data plan.

This app allows its users to register a new SMS phone number, where it allows texts to be sent completely free to another person, or group of people, turning a standard texting conversation into a virtual chat room.

In addition, the user-friendly app provides "Communities" where users can spark up conversations with like-minded individuals, so there is never a lack of conversation. It provides pop-up notifications to keep users in the know, even when they are using a different app, so messages do not get lost in the shuffle. Connect with old friends, and meet new ones without worrying about texting overages again.

Cooking

Allrecipes.com Dinner Spinner for Android by Allrecipes.com

Instead of wasting time in front of the refrigerator, trying to make heads or tails of the ingredients that fall within it, Allrecipes.com has created an app for everyone to get dinner on the table, without giving it a second thought.

Users can type in ingredients, whether it is asparagus or cous cous; dish types, including appetizers, main and desserts; and even cook times for those who have all night, or need something pulled together quickly. The actual "spinner" comes into play when users shake their phones to unveil unique meal ideas, which will inspire the chef in everyone – even the most novice kitchen dweller.

Lastly, users can search by dietary restrictions, including low-fat, vegetarian, vegan, low sodium, and gluten free, while receiving nutritional information. The app also allows its users to collect recipes, and share them with others through Facebook, Twitter, and email, which means that all your friend and family will be able to share in your favorite dishes.

Music

Pandora

Pandora Radio is a musical app that allows the user to input song titles or artists, and the "station" plays music matching those requests, while spinning additional tunes that are relative and similar to those entries. For instance, if the user enters "Miles Davis" as a search artist, it will also play artists like John Coltrane and Thelonious Monk.

The user can provide negative or positive feedback to each song, allowing Pandora to hone the user's musical preferences more closely. Users are offered the option to purchase songs or entire albums during their listening experience, but are not required to do so to enjoy the music.

There are two subscription options available with this app. One: Free service, which is supplied through advertisements, or two: A fee based subscription that allows music to play without ads.

The Pandora library is comprised of 800,000 tracks, from over 80,000 artists, so you will always have plenty of music to listen to.

Spotify

The Spotify app allows users to stream music directly from their tablet while searching for particular musical interests using song titles, artists, album title, record label or genre. Users must have a Facebook account to use Spotify, and are required to login to the service using that account to enjoy the music.

Upon initiation of a Spotify account, a free six month subscription is enacted and supplies the user with unlimited usability during that time. At the close of that trial period, song play is limited to ten hours per month – in two and one half hour increments per week – without a subscription. During those ten hours the listener is subjected to advertisements as a way to pay for the service.

An unlimited listening subscription is available, allowing users access to music whenever they choose, without ads. A premium service is also available that allows the music to stream at a higher bit rate, and also provides offline access to music.

Fliq Calendar

Calendars seem to be a dime a dozen on electronic devices, and typically included in email accounts as well. Each one comes with a built-in version that allows users to enter birthdays, special occasions, and meetings just as any other calendar would.

The Fliq Calendar app takes scheduling a step further, as it syncs with Microsoft Outlook and Apple iCal, so office appointments are viewed at all times, instead of just when the user is at their computer or logged into their business email account.

With exceptional displays for daily and weekly events, this calendar does more than alert its users to scheduled happenings, it also allows them to manipulate the calendar in a color coded sequence to keep personal and business occasions separate, or allow for multiuser activities without confusion.

Finally, this useful app includes a visual padlock, for read only purposes, which means you, and the rest of your household can see what's happening with each other's weeks in advance. The good thing is that your children will not be able to get into your calendar to add something like "get ice cream" to the schedule.

Dictionary by Farlex

When users think of a dictionary app, they often think of the amount of times they need to look up a word to insure its proper definition, etymology, pronunciation or usage. The Dictionary app does that, and even has a thesaurus to increase the use of synonyms in vocabularies, but it goes several steps further by delivering both resources offline as well.

In addition, the app delivers the resources of medical, financial, and legal dictionaries in the same application, which means its users never have to look for answers in a number of places. It also provides encyclopedic references to words or phrases with built-in access to Britannica, Collins, Columbia, and even the beloved Wikipedia. Words can be translated directly within the app in twelve different languages, so its users are never at a loss for words, even when they are traveling in a foreign land.

Shopping

Amazon Mobile

Instead of hopping online to search the app's namesake website, Amazon Mobile brings the shopping opportunities directly to their users with this detailed and easy to use app. It allows users to search for items while perusing product details, availability, pricing, and even user reviews directly from the app. It supports Amazon's famous "1 Click Ordering" capability, wish lists, order tracking, and Prime member support all with a few taps of the fingers.

Users can easily compare prices of items they find in their local stores by scanning the barcode or taking a picture of the item with the app enabled. Amazon will deliver the results from their own inventory, or from that of their available merchants to get the user the best price, and the highest availability possible.

Users also enjoy the Deal of the Day and Lightning Deal alerts, so they never miss out on a bargain again. As with all Amazon purchases, privacy, and security is guaranteed through the use of the app. Users can also share links, purchases and products through social media outlets, email, and text messaging.

Mighty Grocery Shopping List

Anyone can create a grocery list, but only this app can create a Mighty Grocery Shopping List. Instead of jotting down everything you need, every time you are headed to the market, users can integrate shopping lists over periods of time. Simply by adding shopping lists and even scanning receipts and barcodes, the app keeps up on what you buy and how often, so you do not have to remember that you run out of mayonnaise more often than you would like to admit.

This app organizes grocery shopping in a customizable way, so you can keep recipes in one list, and commonly purchased foods in another. It keeps track of pricing, quantities, taxes and even has a coupon indicator. Instead of wandering around the market, wasting time looking for your favorite brand of red wine vinegar, allow the app to give you a tutorial on the market's layout, while delivering aisle by aisle content. Build a master list, and save it to the cloud, so your grocery trips are efficient and affordable going forward.

Social Networking

Facebook

Facebook has taken the world by storm, as friends, family members, and even companies are keeping up with the likes of each other through status updates, pictures, and check-in opportunities that are shared throughout the platform.

Users can request friendships with other users, and once they have become "friends" can view each other's walls, including pictures and postings. Those items can include everything from restaurant reviews and check-ins, stating that the user is or was at a certain establishment, and movie reviews or notifications that the account holder is currently inside the theatre enjoying the latest release.

Users can upload photo albums, and current happenings, while friends can view the posting and comment on them as they see fit. Facebook is a great way to take advantage of keeping up with friends and family members who live far away, without missing a beat, and interacting as often as you would like, or as little as you see fit.

Pinterest

Pinterest is a virtual corkboard that allows users to view, post and "pin" items that they like, love or want to try, web-wide. It is a perfect way to view new fashion trends, decorating ideas or any do it yourself opportunity big or small, including paint applications, woodworking ideas, and flooring alternatives.

Users gain inspiration from items that others post and pin, allowing them to view cool or unique design techniques, travel opportunities, or even culinary creations. It is the perfect way to share exciting new developments with the tried and true traditional applications that have been passed down through generations.

What is great about the app is that users can pin items using their device's camera, so there is no need to wait to add to their Pinterest board, even when they are out and about and see something exceptionally pin worthy.

Twitter

The Twitter app allows users to keep up on "Tweets" or posts from the people they are following, and inform those who are following them of their wit through thoughts and posts that cannot exceed 140 characters.

Once a Twitter account is created, users can search for people of interest, whether it is friends and family members or companies and celebrities, and "follow" them.

This means they will be able to view everything the person or company posts as they report it. In turn, when others follow the user, he or she can state anything they would like – including pictures, links, and antidotes – for their followers to see.

Update friends on your location, events, or even add an interesting or funny happening within seconds using this app.

Instafire - Instagram Client

Instafire was created especially for Kindle Fire HD device owners. Like its original version, Instagram, users are able to take pictures and manipulate their theme through the use of filters, including sepia tones, black and white shades, and the addition of borders. However, this advanced version combines all of the attributes of the original, while adding six magnificent themes, and the ability to subscribe to photos from a particular location.

The app's user friendly interface also allows users to browse and save images, while sharing, commenting or "liking" them on Facebook. Users can follow other users, and search by the person's name, username, or specific tags (like, "cake" or "holiday"). This app provides a new and exciting user experience, and is optimized for Kindle Fire HD users.

Scope (Hub for Tumblr, Instagram, Facebook, Twitter, Foursquare)

Some individuals are Facebook people, while others enjoy Twitter as their main means of social networking. Some, however, communicate with friends and family through Tumblr, Instagram, Facebook, Twitter, and Foursquare equally, enjoying the difference in each application as they report their statuses across each network.

Scope is perfect for the multi-updating status guru, as it allows the user to update each of their statuses, on each network, through one application. No more tapping, typing, and updating each status separately, simply go to Scope and upload pictures, check-in at locations, like, comment and enjoy other networks just as you normally would, but through one app: Scope.

This app provides centralized messaging, so all comments and responses to your posts – no matter which social media platform they are coming from – are routed to one place. In addition, data can be cached, and reviewed offline, while images and updates are organized effortlessly.

WatchESPN

Here is the gist of the WatchESPN app: If you have cable or satellite, and ESPN is part of your subscription packages, chances are, this app will allow you all the privileges of watching ESPN programming no matter where you are.

If your cable provider is one of the over half dozen the app supports (more providers are being added all the time, so if yours is not supported, it could be sooner than later), you can watch any ESPN program, including *Sports Center*, *Pardon the Interruption*, and *NFL Countdown*, directly from your device as they air. Likewise, football, baseball, soccer, tennis, and every other sport imaginable can stream as it airs on your device with the use of the app.

Programs and games that are playing on ESPN, ESPN2, ESPN3, and ESPNU can be viewed through this app, from anywhere, at any given moment. That is pretty hard to beat for sports fans. Plus, family members of sports fans will appreciate the ability to be a bit more mobile during the big games and events.

Travel

Kayak

There are a number of ways to check flights and travel availability, but there is no reason Kindle Fire HD users should waste their time jumping from site to site to find the best deals when there is a Kayak app that can do it for them. Just as its namesake website allows, users can search web-wide flight, hotel, and car rental availability and pricing, while comparing the rates of each provider to insure they are getting the best deal, no matter when or where they are searching from.

When accommodations or flights work for the user, they can be booked directly from the app. Once a trip is booked through the app, it will provide notifications for cancellations, delays, and changes to any reservation as soon as the information is made available. This means that you will no longer have to rush across the airport because of a last second gate change: The Kayak app will alert you immediately, so there will be no need to search for hard to decipher airport arrival and departure screens. Users can also access airport maps to find restaurants, restrooms and ATMs while they wait to board their flight.

MyTopo Maps Pro by Trimble Outdoors

There are a number of GPS, mapping and directional apps available to the masses, but none of them produce topographical results for outdoor enthusiasts like the MyTopo app. If you prefer the road less traveled, this app is calling your name.

The MyTopo app delivers access to over 68,000 topographical maps in the USA and Canada, which is perfect for hikers, climbers, campers, kayakers, rafters, and explorers of all kinds. In addition, it provides information for locating over ten million trails, lakes, peaks, valleys, rivers and even ghost towns. There are five different views to choose from, including street, aerial, hybrid, topographical, and terrain vantage points.

You can plan trips, get directions and save all of the information from those excursions into the cloud, to retrieve them later. Back roads and rustic trails are no match for the MyTopo app, and with it on your device, you will only get lost in the outdoors in spirit, not geography.
